

# SUPERVISION **TRANSFORMED.**

be a **TRANSFORMER**

In partnership with STC Global, we have developed an initiative that bridges the gap between **technical safety training of Front Line Managers (SMSTS/SSSTS) & interpersonal management skills.**

The course curriculum has been developed by a Southern Shield Working Group comprising members some of the largest Tier 1 main contractors in the UK. It addresses topics like "Teaming" - creating a team dynamic with people who've never worked together for a short period of time & optimising productivity of said team.

The programme includes the following skills:

- Conflict Resolution
- Communication
- Managing Discipline
- Teaming
- Building & Developing Relationships
- Quality Management
- Delegation
